

ELASGLOW AIRCRAFT CHOCK

Elasco Products' ElasGlow Aircraft Chock is a revolutionary product for the aviation industry. Our polyurethane-constructed Aircraft Chock is lighter, more durable, and able to withstand more weight than any other product on the market. Like all our products, our Aircraft Chock is focused on offering the highest level of safety and visibility in all conditions. Our Aircraft Chock is made with high visibility safety colors, and with our exclusive glow-in-the-dark material, is easily visible in low-light environments. Our special glow-in-the-dark material charges in natural UV light in under 10 seconds and will hold its glow throughout the night.

For optimum safety, we have also built reflectors on each side of the product to ensure instant visibility.

POLYURETHANE

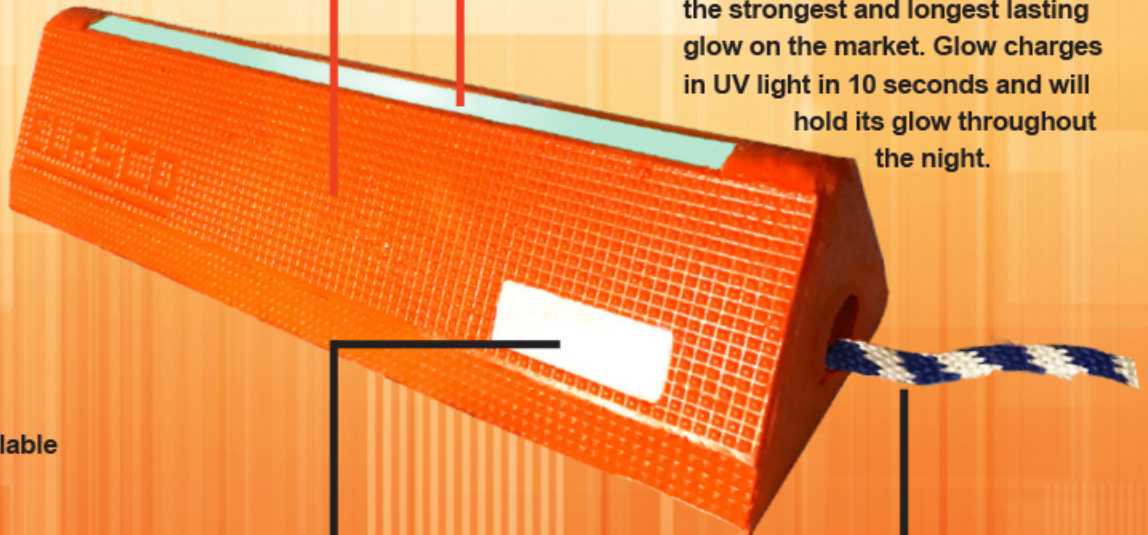

Abrasion-resistant polyurethane designed for longevity and durability. Withstands chemicals and will not rot or deteriorate.

Glow Aircraft Chocks available in lengths of 16" & 24".

GLOW

Elasco's exclusive glow provides the strongest and longest lasting glow on the market. Glow charges in UV light in 10 seconds and will hold its glow throughout the night.

REFLECTOR

Reflectors on both sides of chock help to reflect light for increased visibility

ROPE

Rope attached to chock for easy handling or option to connect two pieces together.
