

# ELASGLOW

## FEATURES & BENEFITS

### GLOW-IN-THE-DARK STRIP TECHNOLOGY

Highest grade of strontium aluminate absorbs UV to glow all night for enhanced visibility and safety.

### QUICK UV CHARGE

Requires only 10 secs of UV exposure to glow all night.

### NO MAINTENANCE REQUIRED

Strips don't need batteries, electricity, or other maintenance.

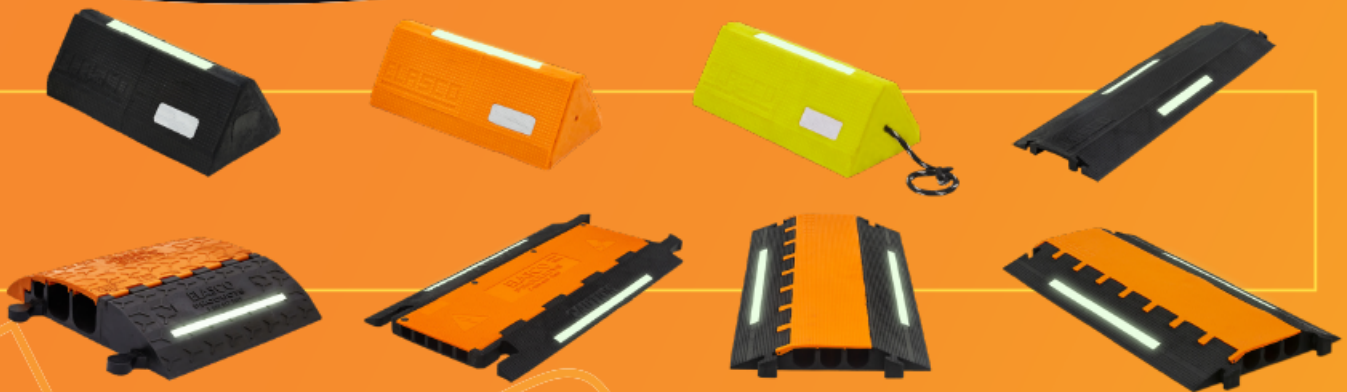

### GLOWS BEFORE DARK

Illuminates low light environments.

### INCLUDED IN ALL PRODUCTS

Elasglow options available in every Elasco line.

Glow is measured in milli-candellas, and in most true dark environments humans can see 3.7 milli-candellas once our eyes have adjusted (which takes most people between 15-45 minutes). Under pure darkness, Elasco's glow material is visible for up to 40 hours once that dark-adaption has occurred.
