

# ELASGLOW PROTECTORS COLLECTION

## EXTREME CABLE PROTECTION

**ELASGLOW Glow in the Dark Cable Protectors provide extra visibility in low light environments.**

Elasco now offers the most visible glow in the dark cable protectors in the industry.

In addition to our high quality urethane protectors, we have incorporated the highest grade of strontium aluminate which requires only 10 seconds of UV exposure to fully charge and will maintain its visibility throughout the night.

Requiring no maintenance, batteries or electricity, these glow protectors are ideal for providing additional visibility when needed in dark conditions.
