

XTREME GUARDS COLLECTION

EXTREME CABLE/HOSE PROTECTION

Strongest Cable/Hose Protector in the industry that can withstand the harshest conditions.

Elasco has introduced the first gull-wing designed cable/hose protector in the industry that comes in 4.5" size channels. Able to withstand the highest load capacity available, this patent-pending design is offered in two or four channel options.

Both options include bonus 2" channels in addition to an updated tread pattern and connector design.

Designed for extreme heavy load conditions in any industry, these products can withstand the most brutal and demanding environments.
