

LED STOP/SLOW PADDLES

High Visibility Signs for Traffic Control Personnel

(Canada only)

Meets MUTCD Standards*

LED paddles have built-in lights that make them highly visible, especially in low-light conditions or bad weather

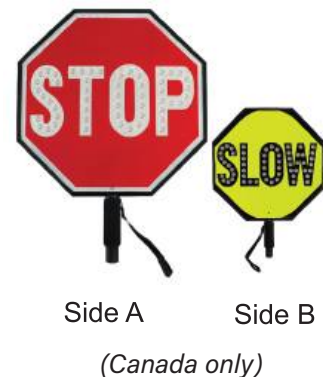

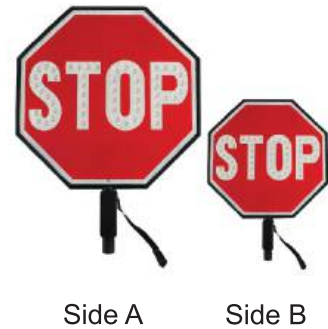

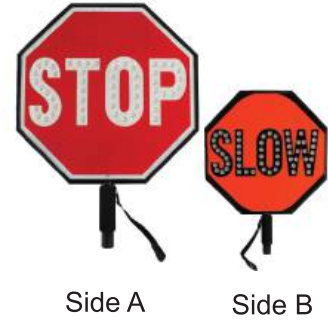

- › Each sign face features LED lights within the lettering
- › Both sides of sign are equipped with easy press power button to utilize preferred light mode
- › Lighting modes: flash, steady, off
- › Features an automatic tilt shut off function on all paddle sizes
- › Tilt on/off helps to save battery, and from having to turn power button on and off during use
- › Visible over 1 mile away when illuminated (1.61 km)
- › Lightweight and comfortable 12" foam handle with strap
- › Rechargeable battery pack with wall and USB port chargers
- › Life expectancy is approximately 10 years
- › Covered by 1 year warranty against manufacturers defects

**Fluorescent lime paddle only meets specifications for province of Manitoba, Canada*
