

LY-25 Pedestrian Crossing

LY-25

It is always important to keep pedestrian safety in mind when designing road layouts and setting up crosswalks. The pedestrian signs and bases from TCT are ideal for alerting drivers to crosswalks and potential pedestrians within them. The signs are designed to alert drivers to potential state or local laws to protect pedestrians who are crossing the street. The signs feature a yellow safety background, as well as text and pictures to communicate to drivers what they should do if there is a pedestrian in the crosswalk. The signs have a flexible post to resume an upright state if struck by pedestrian or motorist.

Specifications

Polycarbonate sign with reflective markings, safety orange flexible post, durable rubber base with yellow striping and reflective eyelets	
Weight	40 lbs / 18.15 kg
Height	41" / 104.14 cm
Length	36" / 91.44 cm
Width	13 3/4" / 34.93 cm

Features

Signs are made of durable polycarbonate, reflective marking, and bold ink lettering and imagery
Ideal for alerting motorists to potential pedestrians within the roadway
Will not rust crack or break due to the elements
• Sign says "State Law - Yield"
Quick and easy to install
Base is heavy enough to stay in location without mounting to road surface
Four holes to make permanent mounting easy
