

Traffic Guard Portable Speedbump

The Traffic Guard is a portable Traffic Calming System designed to control temporary traffic patterns.

Ideal for:

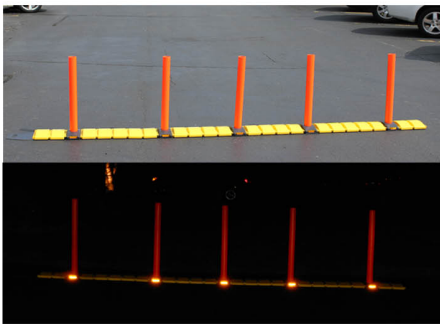

- First Responder Safety
- Incident Management
- Security Check Points
- Child Safety Check Points
- Temporary Traffic Patterns

Roll it out and Roll it up as needed!

Our patented one-of-a-kind alerting strip system is constructed of durable virgin polypropylene plastic, compared to the recycled material some competitors may use. Our bag unit is compact and convenient, allowing for easy storage and transportation. Available in both single lane and dual lane versions. One unit is approximately the size of a spare tire.

Add our Ultimate Guardian option and you can instantly create a unique easily-seen and removable barricade to help alert motorists of an impending danger and help to insure worker & motorist safety in various traffic and low visibility situations.

"The Traffic Guard has been an extremely valuable safety tool to our Department. We utilize one on all of our trucks."

*Chief Joe Tanner
Georgetown, SC Fire Dept.*
